SHIVPRASAD MURKUTE

Pune, Maharashtra | +917745073234 | murkuteshiv98@gmail.com | QA Automation Engineer

SUMMARY

Automation-focused QA Engineer with 4+ years of experience in designing, developing, and maintaining scalable automation frameworks using Selenium WebDriver with Java and TestNG. Strong expertise in API testing (Postman), regression suite optimization, and Agile methodology. Proven track record of reducing manual effort, improving defect detection rate, and ensuring high-quality software releases.

SKILLS

Programming Languages	Java, SQL
Automation Testing Tools	Selenium WebDriver, TestNG, Page Object Model (POM)
API Testing Tools	Postman, REST API Testing
Version Control Tools	Git, GitHub
Testing Methodologies	Test Automation, Manual Testing, Agile (Scrum), SDLC, STLC
Test Management Tools	Azure DevOps, Tuskr
Testing Types	Functional, Regression, Sanity, Smoke, GUI, UAT, End-to-End (E2E)
Operating Systems	Windows 10, Windows 11

EXPERIENCE

QA Automation Engineer – Cloudlex Inc Pvt Ltd | Dec 2021 – Present

- Developed and maintained 150+ automated test scripts using Selenium WebDriver with Java & TestNG.
- Designed automation framework using Page Object Model (POM) to improve reusability and maintainability.
- Reduced manual regression effort by 60% through automation of critical business modules.
- Executed 500+ test cases per sprint including functional, regression, and cross-browser testing.
- Performed API testing using Postman and validated JSON/XML responses.
- Identified and reported 300+ defects using Azure DevOps with proper severity and priority levels.
- Collaborated with Developers and BA team to clarify requirements, reducing requirement defects by 25%.
- Actively participated in Sprint Planning, Daily Scrum, and Retrospective meetings.
- Supported 20+ production releases with zero high-severity defect leakage.

PROJECT EXPERIENCE

Project: Legal Case Management Web Application

- Automated end-to-end workflows including Login, Case Creation, Document Upload, and Reporting modules.
- Integrated TestNG framework for parallel execution and detailed reporting.
- Performed API validation for backend services ensuring data consistency between UI and DB.
- Improved overall test coverage from 55% to 85% through automation suite expansion.
- Conducted database validation using SQL queries for backend data verification.

EDUCATION

MCA – Savitribai Phule Pune University | 2022

CGPA: 8.0
